INVITATION TO PARTICIPANTS

Dear Colleagues,
European University of Brčko District, European Faculty "Kallos" Belgrade and the Faculty of European Legal and Political Studies in Belgrade are organising the XV International Scientific Conference on 14 May 2027, entitled "Global Crises and the Future of Humanity – Peace, Security, Health and Sustainable Development", and cordially invite you to participate.
Humanity today faces multidimensional crises that transcend national, regional and ideological boundaries. Our world is marked by profound geopolitical changes, armed conflicts, crises of the international order, climate change and environmental crises, pronounced economic and social inequalities, energy insecurity and rapid technological development.
In these circumstances, peace, security, health and sustainable development have acquired particular significance.
These issues are no longer merely matters of political strategies and international declarations; they have become questions of collective responsibility, survival and the future of generations to come.
The future of humanity will depend not only on our ability to manage crises but also on our willingness to reconsider the models that brought them about.
This international scientific conference aims to create a forum for critical dialogue, the exchange of knowledge and experience, and the presentation of new scientific findings that will help us understand contemporary global challenges and address questions such as:

• Is the contemporary world undergoing a transformation of the existing international order?

• Do existing international mechanisms and institutions have the capacity to manage global crises effectively?

• What are the prospects for international cooperation in preventing conflict and preserving peace?

• Are states and international institutions prepared for new global health crises?

• Can economic development be achieved without compromising environmental sustainability?

• How do global economic crises affect political stability?

• Does technological progress represent a new opportunity for development or a threat to humanity?

Recognising that complex geopolitical processes can only be understood through a critical, interdisciplinary and scientifically grounded approach, we invite you to contribute a scientific or professional paper to the XV International Scientific Conference and to the discussion of "Global Crises and the Future of Humanity – Peace, Security, Health and Sustainable Development".
